EXPERIENCE

Monomark @ Full-stack developer
February 2022 - Present

Full-stack javascript applications using AWS Amplify (micro-frontends, micro-services, serverless lambdas)
- Investment/Payment platform
- Admin Panel

OPEN SOURCE
August 2017 - Present

I am making open source projects and packages with and for javascript.

NPM Packages by me:
- react-preloaders
    Package for adding preloaders to your React apps
- koa-jwt
    Simple mini-lib for secured APIs and servers with Koa and JWT.
- koa-starter-cli
    Koa boilerplate project generator
- image-analyzer
    Simple Javascript library for analyzing images.
